Data: KPDN PriceCatcher via data.gov.my, CC BY 4.0
By Moztoba Mutashim Billah

The same groceries cost up to 9.9% more depending on the state

Prices vary as much by shop type as by state. Based on 21 million KPDN PriceCatcher records from October 2025 to September 2026, cleaned and analysed in PostgreSQL.

Snapshot comparisons use September 2026. Every shop counts once.

2,087 shops and 338 items loaded

Regional basket gap

Kuala Lumpur RM 4,349.65 vs Kedah RM 3,959.53 (q09)

9.9%

Staples gap, wet market vs hypermarket

RM 99.45 at wet markets, RM 88.76 at hypermarkets (q03)

12.0%

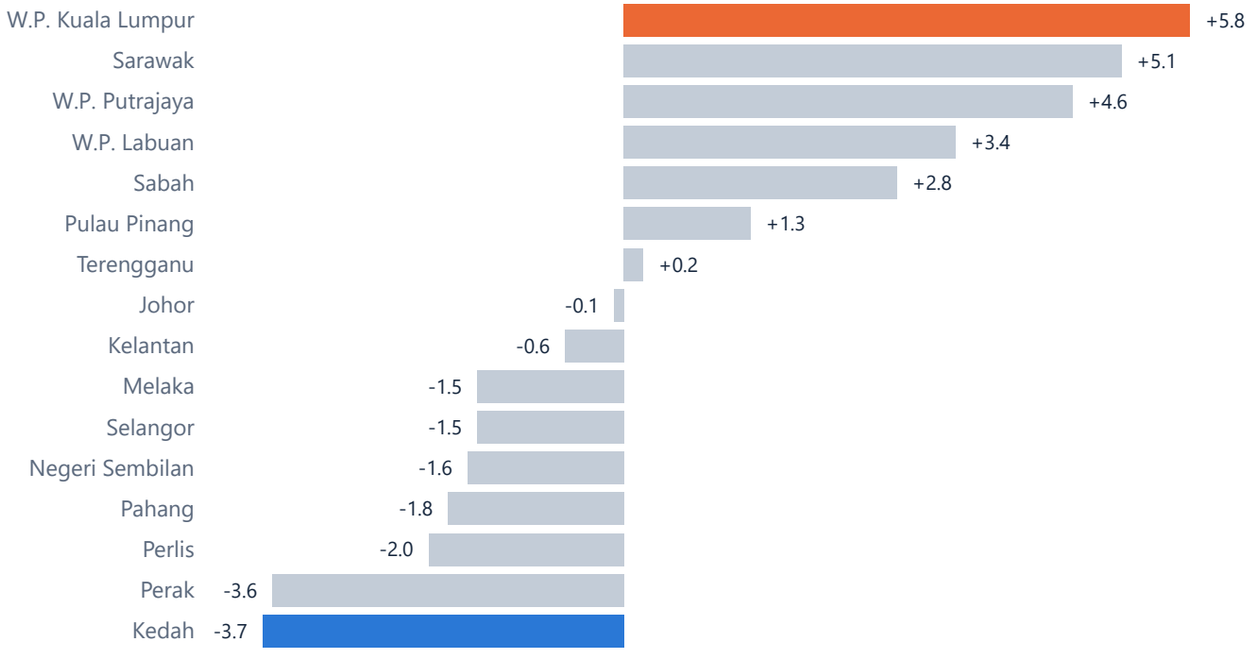

Price-control adherence

17 of 34,609 shop-months above the controlled price (q31)

99.95%

W.P. Kuala Lumpur has the dearest basket (105.8) and Kedah the cheapest (96.3)

Points above or below the national cost of the same 265-item basket, September 2026

Price increases from 3 categories

Vegetables, onions and garlic, meat: 17% of items (q14)

58%

Gap to the price leader, index points

Average supermarket 101.4 vs Tesco 89.3 (q12, q11)

12.1

Spike weeks in December 2025

The peak month; 74 of them were fresh produce (q23)

78

Households and policy

For KPDN: the cost of the same basket by state and district, and price changes before festivals.

State: All

W.P. Kuala Lumpur has the dearest basket (105.8) and Kedah the cheapest (96.3)

Basket index by state, September 2026 (100 = national). Hover a state for its name; select it to filter the page, Ctrl+click to add another.

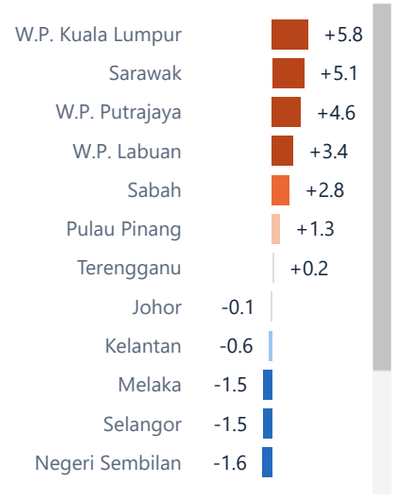

Cheaper ■■■■■■■ Dearer than the national basket

East Malaysia is drawn closer to the peninsula.

All 16 states, dearest first

Points above or below the national basket (100), September 2026.

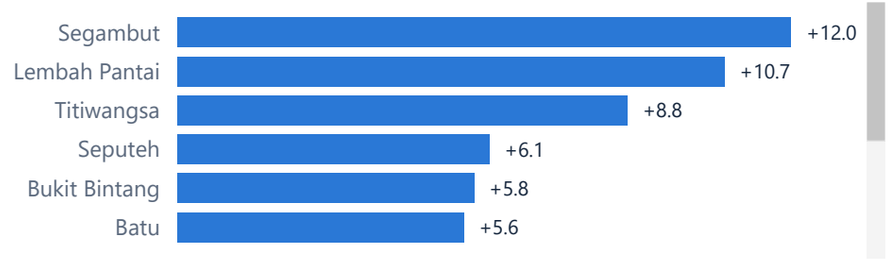

Showing
All 16 states

Basket cost	Basket index
RM 3,959.53 to 4,349.65	96.3 to 105.8

Rank, dearest first	Districts scored
1 to 16	139 of 166

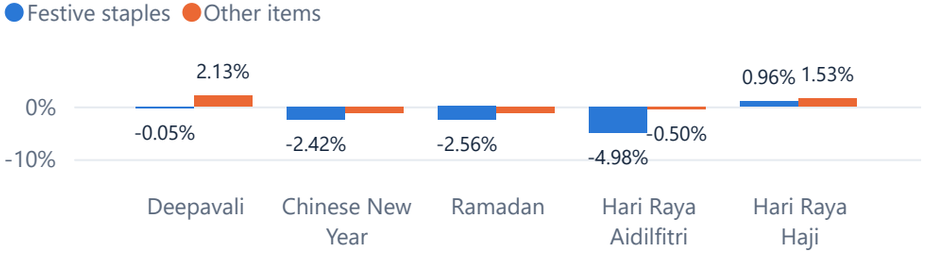

In W.P. Kuala Lumpur, the district basket index runs from 100.4 in Bandar Tun Razak to 112.0 in Segambut

Points above or below the national basket, September 2026. W.P. Kuala Lumpur until you choose a state. Districts with too few items priced are left out.

All states: festive staples changed -2.42% before Chinese New Year and -4.98% before Hari Raya Aidilfitri

Mean price change in the 14 days before each festival against the 4 weeks before that, same shops and items

Retail pricing

For a supermarket chain: how each shop type prices against the national median.

Shop type: All

State: All

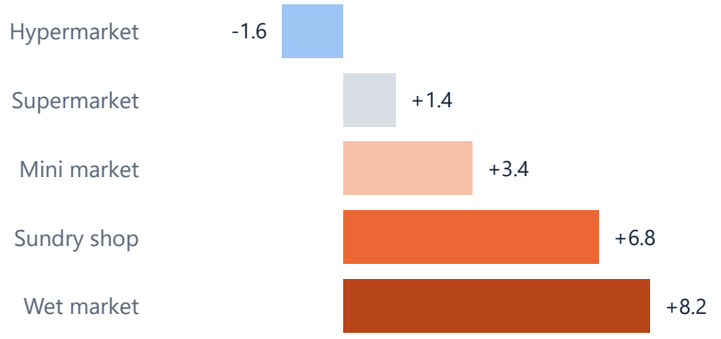

Wet markets are the dearest shop type in 9 of 16 states, and hypermarkets the cheapest in 10

Average shop's price index, September 2026 (100 = national median of the same items). Blue is cheaper, orange dearer. Select a cell to filter the page.

State	Hypermarket	Supermarket	Mini market	Sundry shop	Wet market
Johor	97.5	97.3	105.7	109.4	108.8
Kedah	93.9	96.0	99.0	101.6	104.9
Kelantan	95.4	98.7	102.8	103.9	102.5
Melaka	92.6	95.4	103.0	111.6	108.8
Negeri Sembilan	93.1	96.7	107.2	101.5	107.5
Pahang	98.4	97.5	101.7	108.6	107.9
Perak	96.6	95.9	97.9	100.1	104.7
Perlis	100.2	99.6	99.6	105.4	111.7
Pulau Pinang	93.5	96.2	101.7	107.3	106.8
Sabah	102.3	107.1	110.2	109.7	111.4
Sarawak	107.8	105.6	107.9	109.1	121.5
Selangor	96.3	99.5	104.3	114.7	108.2
Terengganu	99.2	97.2	101.2	105.8	108.2
W.P. Kuala Lumpur	99.0	108.8	106.9	106.2	103.6
W.P. Labuan	99.5	109.9	108.3		113.8
W.P. Putrajaya	105.2	105.7	111.8	119.1	123.9

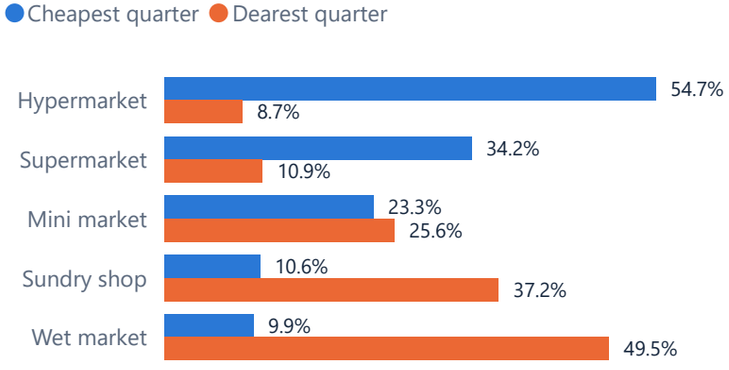

Hypermarkets have the lowest average shop index (98.4), wet markets the highest (108.2)

Average shop's price index minus 100, September 2026

Hypermarkets are most often in the cheapest quarter (54.7%), wet markets in the dearest (49.5%)

Share of each type's shops in their state's cheapest and dearest quarter

Cheapest and dearest shops

Each shop's price index over the items it prices, September 2026.

Shop type: All

State: All

Shops in view	Average shop index	In their state's cheapest quarter	In their state's dearest quarter
2,087	103.6	25.3%	24.7%

The 10 cheapest shops in the chosen states: PASAR GURUN is cheapest (index 84.0)

Price index, 100 = national median of the same items. The index cell uses the heatmap colours.

Shop	Type	District	State	Items	Index
PASAR GURUN	Wet market	Kuala Muda	Kedah	41	84.0
PASARAYA ECONSAVE SEGAMAT	Supermarket	Segamat	Johor	201	84.9
ECONSAVE CASH AND CARRY MALIM S/B	Supermarket	Melaka Tengah	Melaka	206	85.2
LONGWAN GUAR CHEMPEDAK	Supermarket	Yan	Kedah	125	85.4
MERLIMAU POINT	Mini market	Jasin	Melaka	143	85.4
GM RETAIL & WHOLESALE (SP) SDN. BHD. (G MART)	Supermarket	Kuala Muda	Kedah	146	85.7
PASARAYA ECONSAVE FOREST HEIGHT	Supermarket	Seremban	Negeri Sembilan	217	85.8
PASARAYA ECONSAVE JASIN	Supermarket	Jasin	Melaka	194	85.8
ECONSAVE KLUANG	Supermarket	Kluang	Johor	199	86.5
PASARAYA ECONSAVE BAKRI MUAR	Supermarket	Muar	Johor	209	86.5

The 10 dearest shops in the chosen states: TAMU CINA LIMBANG is dearest (index 156.1)

Price index, 100 = national median of the same items. The index cell uses the heatmap colours.

Shop	Type	District	State	Items	Index
TAMU CINA LIMBANG	Wet market	Limbang	Sarawak	32	156.1
PASAR BANGI	Wet market	Hulu Langat	Selangor	52	147.4
PASAR PAGI AWAM JALAN TELAWI	Wet market	Lembah Pantai	W.P. Kuala Lumpur	44	145.7
PASAR SEJAHTERA	Wet market	Limbang	Sarawak	53	144.8
TAMU KROKOP	Wet market	Miri	Sarawak	47	143.9
SYARIKAT SRI ALAM SEK 6 SHAH ALAM	Mini market	Petaling	Selangor	67	142.9
TAI TIAM CHOY	Sundry shop	Melaka Tengah	Melaka	51	136.9
SEIBU TRX	Supermarket	Bukit Bintang	W.P. Kuala Lumpur	94	136.2
PASAR SEGAR MAYA	Supermarket	Lembah Pantai	W.P. Kuala Lumpur	103	135.7
KEDAI RUNCIT GAROK MAJU ENT	Sundry shop	Jerantut	Pahang	38	135.1

Item lookup

Where an item was cheapest, and its price by shop type.

Item group: All

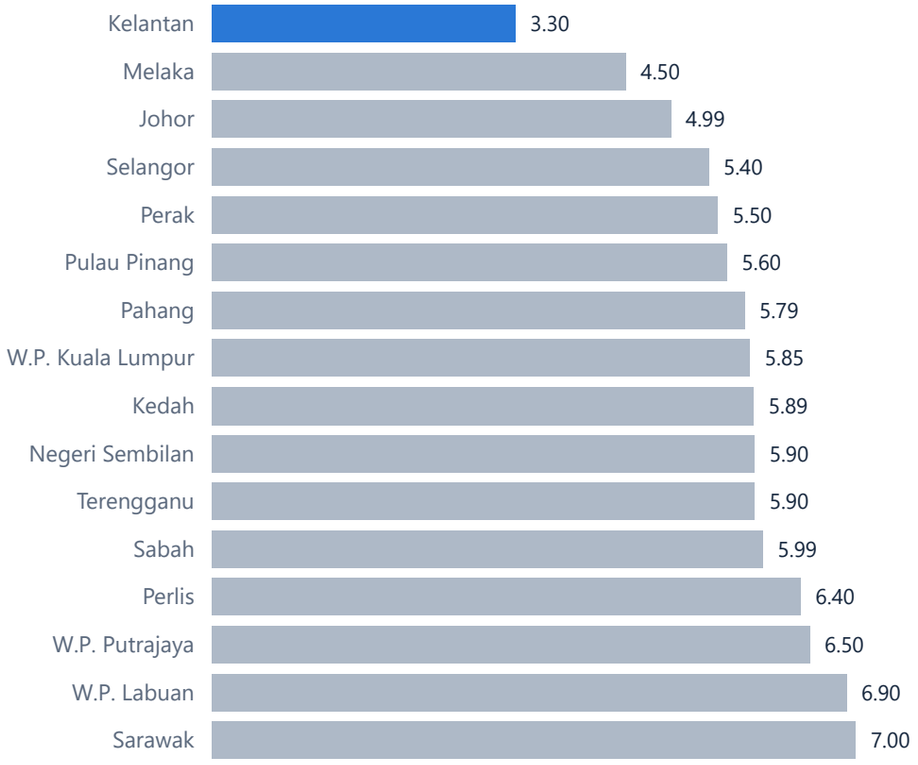

Item (type to search): TOMATO (1kg)

State for shop types: All

National median, RM	Lowest price, RM	Cheapest in	States with a price
8.00	3.30	Kelantan	16

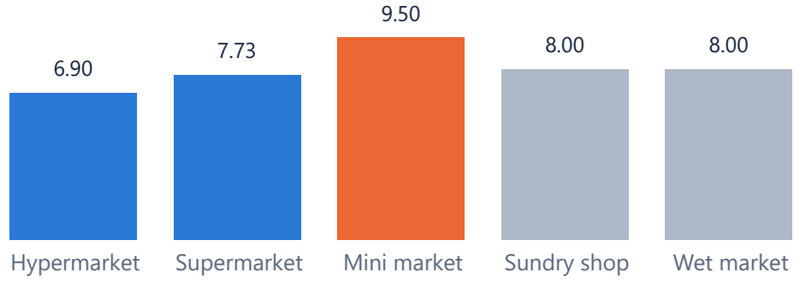

TOMATO (1kg) was cheapest in Kelantan: RM 3.30

Lowest price in each state across all shop types, September 2026. Hover a bar for an example shop charging it.

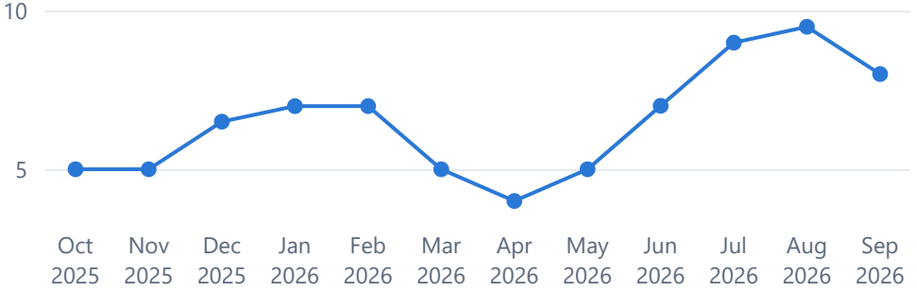

In W.P. Kuala Lumpur, hypermarkets had the lowest median: RM 6.90

Median price by shop type in W.P. Kuala Lumpur, September 2026. Orange is above the national median of RM 8.00, blue below it.

TOMATO (1kg): national median RM 5.00 in October 2025 and RM 8.00 in September 2026

National median price each month, one price per shop

Cost risk

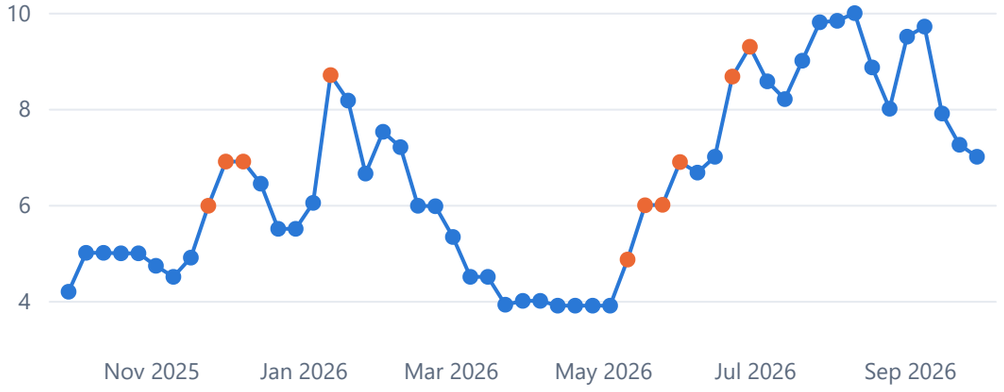

For procurement: the biggest price moves of the year, and the weeks prices spiked.

Item group: All

Item (type to search): TOMATO (1kg)

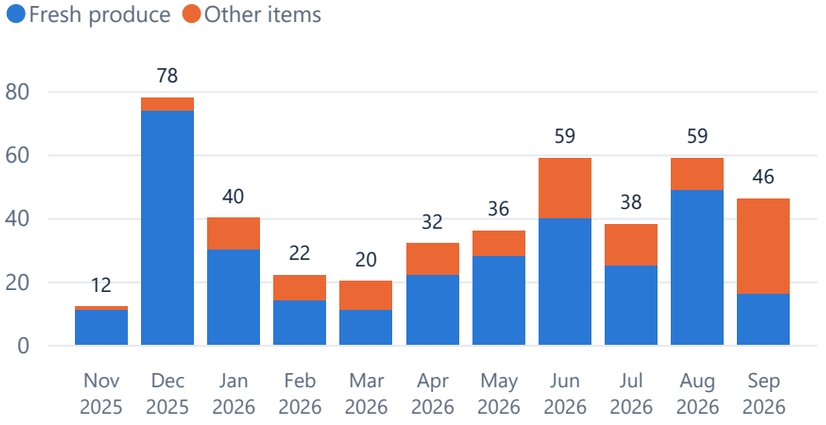

TOMATO (1kg): 10 spike weeks (orange markers)

Weekly national median price. Orange markers are spike weeks: more than 2 standard deviations and 2% above the previous 8 weeks.

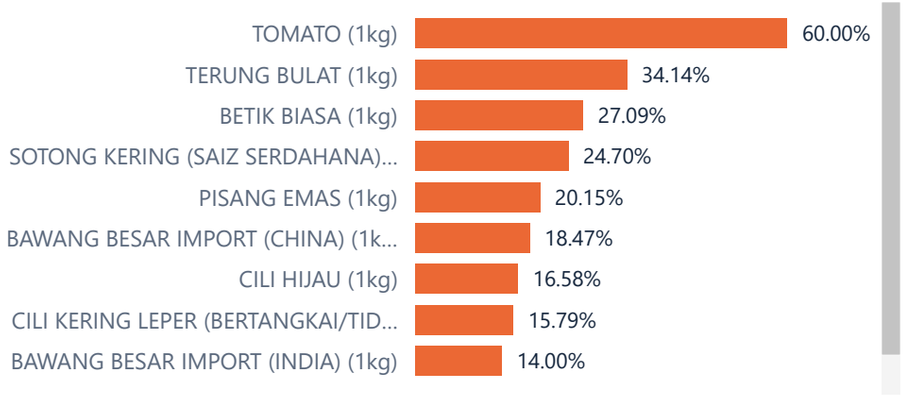

Spike weeks peaked in Dec 2025: 78

Spike weeks by the month each week starts, for the item group in view

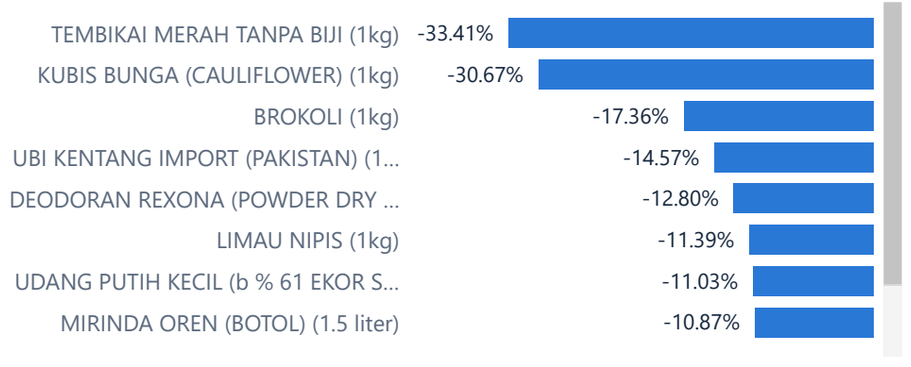

TOMATO (1kg) rose the most since October 2025: +60.00%

Top 10 rises in national median price, October 2025 to September 2026. Items priced by 30 or more shops in both months.

TEMBIKAI MERAH TANPA BIJI (1kg) fell the most since October 2025: -33.41%

Top 10 falls in national median price, October 2025 to September 2026. Items priced by 30 or more shops in both months.

About the data

Every number comes from the 8 CSV files in dashboard/data or the query outputs in results/build_run.

Sources and licence

PriceCatcher (KPDN): 12 monthly files of date, shop, item and price in RM, October 2025 to September 2026.

lookup_item and lookup_premise: item names and groups, and shop names, types, states and districts.

CPI by state (DOSM), used only as a consistency check (q27).

All four are open data from data.gov.my and DOSM under CC BY 4.0. The data keeps that licence; the MIT licence of this project covers the code.

PriceCatcher is built for price surveillance, as data.gov.my states; DOSM's CPI is the official measure of inflation.

How the indexes work

Price index: a shop's price for an item divided by that item's national median in September 2026, averaged over the items the shop prices, times 100. Below 100 is cheaper than the national median.

Basket index: the cost of the same 265 items, each priced in at least 13 of the 16 states, divided by the national cost of that basket, times 100. Where a state has no price for an item, the national median fills in.

District index: the average ratio of a district's median price to the national median over the basket items it prices. Districts with too few items priced are not scored.

Data quality

Seven checks removed 316,802 of 21,039,347 price rows (1.51%), leaving 20,722,545.

Missing or impossible prices: 76
Item codes not in the item list: 313,598
Premise codes not in the premise list: 13
Outliers above 5 times or below a fifth of the item's monthly median: 3,115
Exact duplicates and conflicting prices: 0

Shops that start late or stop early are flagged and kept. Each shop counts once per item and month, so shops that report often do not outweigh the rest.

Method notes

Shop types are compared two ways: the average of each shop's own index (q12, hypermarket 98.4 to wet market 108.2) and the same 181 items in all five formats (q03, hypermarket 95.0 to sundry shop 104.3).

Festive change compares the 14 days before each festival with the 4 weeks before that, in the same shops (q21). A spike week is more than 2 standard deviations and 2% above the previous 8 weeks (q23).

Risers and fallers include only items priced by 30 or more shops in both October 2025 and September 2026 (q13). Item names stay in Malay, as KPDN publishes them.
